

SAMPLE COST ANALYSIS

FOOD MARKET BASKET

This partial cost analysis shows real data from a current Una member as it relates to their food spend.

As part of the discovery process upon joining Una, a market basket can be done to compare your current spend to Una's contracted pricing.

We have the ability to cross reference multiple national distributors and pre-negotiated contracts to find the best solutions for your organization.

This helps visualize the savings that are possible via the group purchasing model and allows you to make informed decisions regarding food costs and product selection.

Typically, a food market basket will compare 25 - 50 line items depending on a member's typical food order. Under special circumstances, a market basket may be able to contain 100+ line items.

RESULTS

SAVING 20% ON FOOD COSTS

In addition to cost savings, this member has access to quarterly reports to uncover additional savings, price protections, and resources to help circumvent supply chain disruptions and product shortages.
